

The story so far: WtE Planning Project

This part of the website looks at the story so far and the path of this PhD project. What is the UK waste situation and the drivers for new WtE systems? What are the technology options and how can we choose them? And perhaps most importantly what do we need to know so that we can choose the right size/s or site locations for our WtE strategies?

The "How to tackle this" links lead to how this project approached these questions.
