

## Case study project results

This part of the website provides the results of the techniques described in "The story so far" section. The project has been supported by Warwickshire's officers at the County Council and results were presented to the Warwickshire Waste Partnership on the 3rd October, 2006.

Large, medium and small-scale WtE options are shown by maps illustrating the positions and sizes of the plants. The results of an overall assessment of these options, taking into account technology is shown here.

The project has also used Cornwall as another area to apply its WtE planning methods.

Copies of the Cornwall WtE planning report can be obtained from Adrian Lea and Anthony Weight of Cornwall County Council. Copies of the Warwickshire WtE planning report can be obtained from Jonathan Horsfield and Kalen Wood of Warwickshire County Council.
